FIELDWORK LOCATIONS

United States, Canada, Ireland, Ecuador and Costa Rica

SCHOLARLY INTERESTS & EXPERIENCE

Medical Anthropology, Urban Studies, Gender Studies, Race and Ethnic Studies, Complementary and Alternative Medicine, Women's Health, HIV/AIDS, Smoking Cessation, Infant Mortality, Harm Reduction, Health Services Research, Program Evaluation Studies, Ethnographic Film Production

Education

Ph.D. Cultural Anthropology **2006**
Syracuse University, Maxwell School of Citizenship & Public Affairs, Syracuse, New York
Dissertation Title: "WIC and its Metaphors: Urban Risk, Motherhood, and the Strategic Use of a Public Health Program"

M.A. Cultural Anthropology **1998**
Syracuse University, Maxwell School of Citizenship & Public Affairs, Syracuse, New York
Master's Thesis: "A Room Without A View: Breastfeeding Discourses and Irish Women's Changing World"

B.A. Anthropology (Magna cum laude) **1990**
State University of New York at Oswego, Oswego, New York
Minor Study: French

Additional Training

Emergency Medical Technician (NREMT) **Current**

CIE Fulbright Scholarship Program **Aug-Dec 2010**
J. William Fulbright/McMaster University, Toronto, Ontario, Canada
US-Canada Fulbright Distinguished Scholars Program, Visiting Canadian Research Chair, McMaster University, Institute of Environment and Health
Project Title: "'Symptoms of Canada': Cultural Identity, unexplained syndromes, and uses of complementary and alternative medicine in Canada"

Certificate in University Teaching **2006**
Future Professoriate Program, Syracuse University, Syracuse, New York

Visiting Research Scholar**May 2002-June 2003**

University of Illinois at Chicago, School of Public Health, Institute of Health Services Research and Policy, Chicago, IL

Association for Teachers of Preventive Medicine**June 2000-Feb 2001**

University of Rochester, Division of Public Health Practice, Department of Community and Preventive Medicine, Rochester, NY

CDC-ATPM Grant: "MACH 2010"

Maternal and Child Health Analytic Training for 8-month informatics capacity building among agency-level and county-level staff in New York State

Intensive Spanish Language Training**Aug-Oct 1999**

Centro de Estudios Interamericanos (CEDEI), Cuenca, Ecuador

Graduate Research Fellow**Oct 1997-Feb 1999**

Onondaga County Department of Health, Syracuse, NY

Research Fellow to HRSA-funded infant mortality prevention project

Program Title: "Syracuse Healthy Start"

Syracuse University Women's Studies Program**1998**

Syracuse University, Syracuse, NY

Graduate Certificate in Women's Studies

Master's Thesis: "A Room Without A View: Breastfeeding Discourses and Irish Women's Changing World"

Epidemiology Training Course**1997**

Rollins School of Public Health, Emory University/Centers for Disease Control and Prevention, Atlanta, Georgia

Certificate in French**1988**

Université de Neuchatel, Neuchatel, Switzerland

Current/Recent Employment

Associate Professor of Anthropology & Interdisciplinary Studies***2008-present******Director, Gender Studies*****Whitman College. Walla Walla, WA**

Duties include teaching 5 courses per year along with directing a summer ethnographic fieldschool in Highland Ecuador, "Whitman in the Andes" (see below). Although my principal appointment is in the Department of Anthropology, I am a core faculty member of the Gender Studies and Race and Ethnic Studies Programs. I teach large, lecture-based introductory courses (e.g., Intro to Cultural Anthropology, Biological Anthropology and Human Evolution, Intro to Gender Studies), mid-level special topics courses (e.g., Culture, Health, & Indigenous Development in the Andes, Critical Voices, Sex & Gender in Anthropological Perspective), and upper-division seminars in theory and methodology (e.g., Senior Thesis across disciplines, Urban Anthropology, Ethnographic Research and Writing, and Medical Anthropology). Served as 2009 Director of the Gender Studies Program and assumed 3-year Directorship in Fall 2013.

Summer Field School Director, "Whitman in the Andes"
Cañar, Ecuador

Summer 2008 & 2009

The program is a 7-week field-based study abroad that allows students to live and conduct ethnographic research in indigenous communities of the south-central Ecuadorian Andes. Students live with indigenous Cañari host families in small hamlets dotting the town of Cañar (population 5,000), dividing their time between classroom instruction in ethnographic field methods and Andean society and culture, and the execution of individual research projects. Early in the program students are required to select topics for their research projects (under a general theme of "health, development, and migration"). In addition to readings, discussion, and a number of small methods assignments carried out in South America, each student is required to write a 20-25 page ethnographic report detailing their research findings once back in the U.S.

Fulbright-McMaster University Visiting Research Chair

Aug-Dec 2010

Institute of Environment and Health. McMaster University. Hamilton, ON

Project Title: "Symptoms of Canada: Cultural identity, unexplained syndromes, and uses of complementary and alternative medicine in Canada."

Funded for qualitative research in Ontario, Canada, where I had an academic affiliation and administrative support from McMaster University and lived and conducted research in the Greater Toronto Area. The work in Toronto was set up as comparative to Portland, and included in-depth interviews with naturopathic doctors and acupuncturists, interviews with patients suffering hard-to-diagnose illnesses (fibromyalgia, lupus, multiple chemical sensitivities), focus groups, and observations in CCNM and integrative medicine clinics. Up to this point, research in Toronto and Portland has been of a preliminary and exploratory nature. Moving forward, the data from each of these smaller projects will be used to design a study (with both basic research and intervention goals) of the extent to which a patient's active participation in treatment (i.e., what do patients know about the treatment modality they are choosing, such as acupuncture, and what are their expectations in terms of their responsibilities in the practitioner-patients relationship) affects health outcomes. Two theoretical streams will frame the work: 1. Whole Systems Theory as applied to the therapeutic relationship between patient and provider (i.e., as a dialectic relationship, a partnership that imposes responsibilities on both parties); and, 2. Placebo Context Effect and how the ritual of the therapeutic event and verbal suggestions modulate outcomes. Research design will include developing a "patients' responsibility" protocol for patients to read and sign before treatment begins. The protocol will comprise a health plan that elicits the patient's expectations (e.g., in terms of what will happen at appointments such as talking to a provider and which treatments will occur as well as what health outcomes are desired over the short and long-term) *and* outlines the patient's responsibilities (e.g., agreeing to detox, adopting a gluten-free diet, etc.). Following Benedetti, the protocol is designed as a placebo, as a form of verbal suggestion. The control group will not receive the protocol so that the health outcomes of the two groups can then be followed for outcomes (health and patient-response outcomes).

Executive Director and HIV/AIDS Prevention Services Coordinator
Blue Mountain Heart to Heart. Walla Walla, WA

Jul 2003-Jul 2007

Programs Manager and Executive Director of non-profit HIV/AIDS/Hep C services agency in southeastern Washington State funded through state Omnibus and federal Ryan White Program dollars. Responsible for grant writing, program evaluation and reporting, fiscal management, newsletter publishing, supervision of 5 staff members and 3-5 volunteers, working with a 12-member Board of Directors, participating in and assuming leadership positions on the Centers for

Disease Control and Prevention State and Regional HIV/AIDS Planning Groups and Ryan White Program Consortium, coordinating and conducting HIV prevention education, Latino outreach, client advocacy (i.e., direct client services to persons living with HIV or AIDS), and HIV and Hepatitis C counseling and testing. Collaborated with state and national epidemiologists and public health administrators to link clients to medical, housing, legal, nutritional, and psychosocial services.

Visiting Research Scholar/Project Manager

May 2002-Jun 2003

Institute for Health Services Research and Policy, School of Public Health, University of Illinois at Chicago

Project manager of a HRSA-funded smoking cessation intervention project in Chicago and throughout the state of Illinois. Responsible for data collection (qualitative and quantitative), analysis (using NVivo for ethnographic data and SPSS and SAS for quantitative data), and reporting. Supervised the work of four MPH research assistants and traveled across the state to coordinate project activities with directors of maternal and child health clinics.

Research Associate

Mar 1998-Oct 2000

University of Rochester Department of Community and Preventive Medicine, Division of Public Health Practice

Evaluator of the Syracuse Healthy Start Project (a HRSA-funded infant mortality prevention program). **Ethnographer** for the LINCOS Project, a coordinated effort with MIT, the Technical Institute of Costa Rica, and the Organization for Sustainable Development of Costa Rica to introduce computer technologies and telemedicine sites throughout Costa Rica. **Project assistant** to a CDC/ATPM-funded Maternal and Child Health Analytic Training Program (8-month-long Internet-based distance learning program) for New York State public health and community agency staff. **Project assistant** to a NIH-funded, Costa Rica–U.S. Training Program in Community Health Informatics (“InfoComm”). **Focus group analyst** on two projects sponsored by the Monroe County Department of Social Services: 1) Child Abuse/Child Neglect Formative Research Initiative; and, 2) WIC Program Assessment. Participated in focus group protocol development, focus group administration, and focus group analysis.

Graduate Fellow

Oct 1997-Feb 1999

Onondaga County Health Department, Syracuse, NY

Assistant to the Project Director for the Syracuse Healthy Start Program. Coordinated in-service education to area providers on breastfeeding, smoking cessation, and low literacy. Organized a community education and counselor training program on breastfeeding, taught breastfeeding awareness seminars for healthcare providers, and created a Syracuse University-community forum on breastfeeding. Collaborated with local United Way’s Success By Six Program to prepare SIDS prevention campaign. Prepared infant death reports for the County Child Death Review Board, and co-wrote a social risk screening tool to be used by public health nurses during home visits with pregnant and post partum women. Concurrent with my direct work on the infant mortality prevention project I conducted research for my dissertation: “WIC and its Metaphors: Urban Risk, Motherhood, and the Strategic Use of a Public Health Program.”

Graduate Assistant

1999 and 2001

Global Affairs Institute, Maxwell School of Citizenship and Public Affairs, Syracuse University

Worked with a multidisciplinary team to develop a program of study in gender and globalization. Conducted a 3-month study of a migrant sending community in southern Ecuador. Assisted in the

development and writing of a grant proposal to the Rockefeller Foundation Humanities Fellowship Program.

Teaching Experience

Visiting Assistant Professor of Anthropology

Jan-May 2008

Cornell University, Ithaca, NY

Hired as a sabbatical replacement, I designed and taught two courses that fulfilled Cornell Anthropology Department's commitment to the University Writing Program (i.e., both courses were writing intensive). The first course was an upper-division class in medical anthropology in which most students were health sciences majors, "Medicine, Culture, and Society." The "medicalization of life" theme that characterized the course reflected my own studies of how local health perceptions and practices reflect larger issues of social change and structure cross culturally. I taught about the ways in which biomedicine and medical language have come. The second course was a Freshman Writing Seminar, "Culture and AIDS," which explored the politics of HIV/AIDS over time and space through public discourse (e.g., discourses of fear, historically-based metaphors, social activism, and media coverage), medical literature and clinical studies, studies of stigma and political violence in areas of high disease rates, and prevention campaigns. Focus was on the evolution of global perceptions about HIV transmission, risk factors, and experiences of living with HIV/AIDS. Students worked through memoir, ethnography, news media, and public health/medical journal writings that traverse the 25-year+ history of the virus to represent modernity, authoritative knowledge and a driving force behind individual and group decision making.

Adjunct Assistant Professor of Anthropology & Gender Studies

Fall 2004-Fall 2007

Research Associate, Department of Anthropology

Whitman College, Walla Walla, WA

Duties included teaching 3 courses in anthropology, gender studies, and general studies. In addition to coursework, I was available to advise anthropology and gender studies majors who were developing senior thesis projects. During my appointment I served on a committee to examine the makeup and evolution of "non-traditional" teaching positions at the College. I received internal support from the College to hire student collaborators on my film project: "From Our Sternight: Birth and Indigenous Politics in Cañar, Ecuador." The film chronicles the lives of indigenous women who are active participants in a strong indigenous movement in Cañar, Ecuador yet opting out of particular indigenous practices such as traditional, midwifery births. Finally, during the fall 2007 I designed, promoted, and recruited participants for a summer ethnographic fieldschool in Ecuador that was launched by Whitman in the summer of 2008.

Instructor of Anthropology

Fall 2006

Walla Walla University, College Place, WA

Instructor of Anthropology & Women's Studies

Fall 2003 & Fall 2007

Walla Walla Community College, Walla Walla, WA

Instructor of Epidemiology

Fall 1998

State University of New York Health Science Center, College of Health Professions, Syracuse, NY

Part-time Instructor of Anthropology & Teaching Associate

Spring 1995-Spring 2002

Syracuse University, University College, Syracuse, NY

Awards: Outstanding Teaching Associate, Spring 1997. Graduate School, Syracuse University, Syracuse, NY.

<u>Teaching Competencies:</u>	cultural anthropology	gender, race/ethnicity & health
	medical anthropology	applied anthropology
	biological anthropology	epidemiology
	gender studies	race and ethnic studies
	urban studies	qualitative methods

Submitted and Published Works

Morrissey SE. *Life Strategies: Motherhood, Urban Poverty, and the WIC Program in the United States*. Book Prospectus submitted July 10, 2013 to Rowman & Littlefield Publishing Group, Lexington Books Politics and International Relations Series (under contract for 2014 distribution).

Morrissey SE. Law Enforcement Assisted Diversion (LEAD): Mediating Police-Community Relations in Seattle, Washington. Submitted August 2014 to *PoLAR (Political and Legal Anthropology Review)*.
