Q: I lost my COVID-19 vaccine card. What should I do?

A: There are a few options:

1. Go to the IIS (Immunization Information System) and look up your COVID-19 vaccinations to their IIS and related systems. If you were vaccinated in a different state, you can contact that state health department to request a replacement card.

2. You may also reach out to the county department of health or pharmacy where you were vaccinated to request a replacement card.

3. Visit the CDC website. Vaccination providers are required to report COVID-19 vaccinations to MyIR ("My Immunization Registry") to look up your COVID-19 vaccination record, and then take a screenshot or photo of the information. If you do not have an account, you can authorize use on Whitman’s social media unless otherwise specified.

You may also need to be the county department of health or pharmacy, whom you trust with the information, request a replacement card.

Have a virtual event you’d like to share with campus? Email the details to whitmantoday@whitman.edu. Submissions are welcome! If you have a professional or personal accomplishment to celebrate, you may submit it to Whitman Today for consideration.

Submit News of a Personal or Professional Achievement

Students, do you have questions about the CESRP? Kelsey Martin, community engagement specialist, is ready to help. Contact her at martinka@whitman.edu for more details.

Applications for CESRP Are Due on Friday!

The Community Engaged Summer Research Program (CESRP) supports Whitman College students to engage in projects that thoughtfully engage with pressing issues in the Walla Walla Valley and beyond. CESRP is pleased to announce that applications for the Summer 2021 program are due this Friday! Review the application information and application form at whitman.edu/cesrp. The schedule and all Zoom links are available on the Whitman Calendar.

The schedule and all Zoom links are available on the Whitman Events Calendar.

They say design is the New Landscape Architecture. While one may be more physical and the other more abstract, they are both about shaping the future. The future of our environments is crucial to address, as we work to build a more inclusive and sustainable planet.

Somebody and Badly featured in Oddville

Emily Somosky, visiting assistant professor of art, and senior Lia Beatty had artwork featured in this month’s issue of Oddville. Somosky and Beatty are featured on the cover of Oddville. Their work, "The Jungle" and "Space," respectively, showcase their unique perspectives on the natural world. These pieces highlight their dedication to exploring and celebrating the beauty of nature through art.

Authorship in Herpetology

According to the cover story, "Quantifying the Gender Gap in Authorship in Herpetology" by KN Rock et al., the number of women publishing in herpetology has been steadily increasing, narrowing the gender gap. To demonstrate the progress of women who publish with stipend and who are positively represented in the scientific community, we need to continue to support their research and provide opportunities for them to present their findings.

To celebrate the advances made by women in herpetology, the authors on the cover of Herpetologica are on the cover of this month’s issue of Herpetologica. Kate Jackson, professor of biology, and her Ph.D. student are on the cover of the Herpetologica. They are joined by other female herpetologists (including Jackson) in the advances made by women in herpetology.

Celebrate Student Research
