The CDC is tracking vaccine reactions through new info. It may take an average of one to two days to notice any side effects. Typically, the majority of adverse reactions occur within 30 days of getting the shot. In the Johnson & Johnson clinical trials, side effects lasted an average of two days. In the Moderna trials, these side effects occurred most often within two days of getting the shot. Be sure to report any symptoms to your healthcare provider.

Q: What types of symptoms are normal after receiving the COVID-19 vaccine?

A: According to the CDC, children may experience a variety of symptoms after receiving a COVID-19 vaccine. These symptoms are typically mild and include:

- Fever
- Chills
- Fatigue
- Headache
- Muscle aches
- Nausea

These symptoms are usually gone within a few days and are not serious. It is important to monitor for any unusual symptoms or worsening symptoms.

To get a better understanding of vaccine reactions, the CDC has set up a new info. You can visit the website, which provides information on the types of symptoms you may experience. Additionally, you can download the app and track your symptoms over time.

Ready to apply? Learn more about the application process by visiting the website. You will find all the necessary information and resources to help you through the process. If you have any questions about the application process or the school, feel free to reach out to us.

Question of the Week

What was your aha! moment that influenced you to choose Whitman College? You can email your response to whitmantoday@whitman.edu to be featured in the next edition of Whitman Today.

Library Hours

The main library will be open from 8 a.m. to 6 p.m. on weekdays, and from 11 a.m. to 4 p.m. on weekends.

Events Calendar

For the latest events and announcements, please visit the Events Calendar on the school's website.

Whitman Today Staff

If you have any questions or feedback, please feel free to email us at whitmantoday@whitman.edu.
