COVID-19 Testing

Q: I’ve been tested as part of the pooled surveillance testing process. Why don’t I see those results in my Meenta dashboard?

A: Because pooled surveillance testing processes many samples together, the results of that test are considered to be for the pool of samples as a whole and not for individuals. So while you receive an email notification from Meenta indicating that your sample was part of a pool that tested negative, that result is not tied to your personal Meenta account. Individuals who have tested positive in a random sample surveillance testing are contacted by the Whitman COVID-19 Testing team.

Open Office Hours for Students with Dean Kazi Joshua

RSVP Deadline for Design Thinking Workshop

Laura Cummings

For further information or to schedule an OCS advising appointment, email whitmantoday@whitman.edu.

Upcoming OCS application deadlines

Liberalism and Liberal Rights
