113 Foundations: Object Memory: Unearthing Material, Form, and Context  
**Not offered 2020-21**  
**3 credits**  
In this course students will explore notions of “objective history” and “objective memory” by attending to the ways in which certain objects (for instance monuments and memorials, but also more general architectures and artifacts) are made to re-member the past for us. The remembered past is inevitably a partial past—both in the sense of being incomplete, and in the sense of serving certain interests. Through individual and group research projects we will excavate as-of-yet buried pasts, and through the development of a broad range of theoretical and practical art-making skills we will learn how to render these histories/memories in and through objects. Themes of sculptural material, form, and context will be of special interest throughout. Students will be introduced to and receive instruction in a variety of sculptural methods, including but not limited to woodworking, metal-fabrication, plaster casting, and carving. In addition to the research projects mentioned above, students will be expected to participate in individual and group critiques. **Fee:** $150.

201 London Museums: Making Meaning, Making Art
Summer 2021 A  Gulbransen and Lux  3 credits
Fall 2021 B  Gulbransen and Lux  1 credit
In this course, students will approach museums and collecting institutions from two overlapping disciplines: art history & visual culture studies and studio art. The course reveals the many (perhaps underrecognized) ways in which artists and scholars work with museums and collections. In addition to displaying work in museums, artists utilize museum collections to create art installations, create work that references or critiques museum spaces and display conventions, and serve as artists-in-residence at museums. Similarly, academics in the fields of art history, architectural history, and visual culture studies explore the Enlightenment and colonial history of the museum institution, examine the politics of race, gender, class, and sexual orientation through the analysis of collections and their methods of display, curate shows, write exhibition catalogues and essays, assess repatriation claims and the authenticity of objects, critique the aesthetics of exhibition design, and determine ethical practices for art conservation. By studying both the institutions themselves, and examples of artists and scholars who work around and within them, students will gain an understanding of the important role of museums to exhibit culture, produce knowledge, and inspire artistic production.

The London Summer course utilizes a unique hybrid of seminar and studio formats combined with museum and gallery site visits and guest lectures from artists and museum professionals. Students will read about, discuss, and write about exhibition practices, the history of museum collections, and artists who make work within them. Students will also make drawings, photographs, models, and other types of visual creative production in response to individual objects and exhibitions they visit in London.

The Fall course at Whitman seeks to mirror the professional experiences of art scholars and critics, museum staff and gallerists, and practicing artists through the collective production of an exhibition on campus. The exhibition will be accompanied by a student-produced catalogue with short essays, photos, and descriptions of works in the show.

314 Art and the Anthropocene
Spring  
Pietrantoni  
3 credits
This course takes as its subject the tangled web of relations--aesthetic, ecologic, and political--at the center of the concept of the Anthropocene.
