Index

A
absolute extremum, 117
algebraic precedence, 313
alternating harmonic series, 269
antiderivative, 153
arc length, 230
arccosecant, 94
arccotangent, 92
area between curves, 149
asymptote, 21, 114

B
bell curve, 224
bounded function, 51

C
cartesian coordinates, 237
cardioid, 238
circle, 31
chord, 30
chain rule, 65
cosine, 53
cosine function, 53
cosine curve, 53
cosine area, 314
cosine volume, 314
cosine continuous, 53
cosine convergent sequence, 255
cosine convergent series, 260
Cartesian, 237
cartesian coordinate system, 237
cartesian coordinates, 237
cartesian plane, 237
cartesian product, 54
cartesian coordinates, 237
cartesian plane, 237
cartesian coordinates, 237
cartesian plane, 237

cartesian coordinates, 237
cartesian plane, 237

cartesian coordinates, 237
cartesian plane, 237

cartesian coordinates, 237
cartesian plane, 237

cartesian coordinates, 237
cartesian plane, 237

cartesian coordinates, 237
cartesian plane, 237

cartesian coordinates, 237
cartesian plane, 237

cartesian coordinates, 237
cartesian plane, 237

cartesian coordinates, 237
cartesian plane, 237

cartesian coordinates, 237
cartesian plane, 237

cartesian coordinates, 237
cartesian plane, 237

cartesian coordinates, 237
cartesian plane, 237

cartesian coordinates, 237
cartesian plane, 237

cartesian coordinates, 237
cartesian plane, 237

cartesian coordinates, 237
cartesian plane, 237

C
chain rule, 65
circle, 31
chord, 30
cosine, 53
cosine function, 53
cosine curve, 53
cosine area, 314
cosine volume, 314
cosine continuous, 53
cosine convergent sequence, 255
cosine convergent series, 260
cartesian, 237
cartesian coordinate system, 237
cartesian coordinates, 237
cartesian plane, 237
cartesian coordinates, 237
cartesian plane, 237

D
definite integral, 157
dependent variable, 22
derivative, 32, 46

decomposing the square, 313
composition of functions, 25, 43, 65
congruent down, 112
congruent up, 112
congruent, 112
congruent area, 314
congruent surface area, 314
congruent volume, 314
continuous, 53
continuous cosine, 53
continuous cosine convergent sequence, 255
continuous cosine convergent series, 260
continuous cosine coordinates, 237
continuous cosine converting rectangular to polar, 238
continuous cosine polar, 237
continuous cosine rectangular, 237
cosine law of, 254
critical point, 106
critical value, 106
cumulative distribution function, 223
curve sketching, 105
cycloid, 247
cylinder, 314
cylinder lateral area, 314
surface area, 314
volume, 314

E
equation of ellipse, 313
area under curve, 149
area between curves, 189

F
Fermat’s Theorem, 106
fundamental theorem of algebra, 109
fundamental theorem of calculus, 151
Fบริunan, 284
Functun, 142

G
Gabriel’s horn, 220, 236
greatest integer, 109
group, 260

H
harmonic series, 263

dot notation, 130
leibniz notation, 47
second, 111, 112
difference quotient, 30
differential, 51
differential, 142
differential probability, 220
divergence test, 262
divergent sequence, 255
divergent series, 260
domain, 21
dot notation, 130

I
implicit differentiation, 87
implicit function, 88
improper integral, 217
convergent, 217
divergent, 217
indefinite integral, 157
independent variable, 22
inflection point, 113
integral, 217
indeterminate, 157
of area, 173
properties of, 161
integral sign, 153
integral test, 266
integration by parts, 175

K
kinetic energy, 219
K

L
L’Hospital’s Rule, 96
lateral area of a cone, 128
law of cosines, 314
law of sines, 314
leibniz notation, 47
limit, 39
limit at infinity, 96
limit of a sequence, 255
linear approximation, 141
linearity of the derivative, 58
linear extremum, 105
local extremum, 105
local minimum, 105
logarithm, 80

M
Maclaurin series, 284
Mean Value Theorem, 144
moment, 213
Newton’s method, 208
Newton’s method, 137–139
normal distribution, 229

O
one sided limit, 44
optimization, 117

P
p-series, 266
parametric equations, 266
partial fractions, 178
physicists, 130
point-slope formula, 314
polynomial, 237
power function, 55
power rule, 55, 87, 90
precise, 260
of algebraic operations, 313
probability density function, 222
product rule, 55, 62

generalized, 62
properties of integrals, 161

Q
quadratic formula, 313
quotient rule, 62

R
radius measure, 71
radius of convergence, 280
random variable, 222
rational function, 144, 178
rectangular coordinates, 237
related rates, 129
Rolle’s Theorem, 144

S
second derivative, 111, 112
sequence, 254
bounded, 258
bounded above, 258
bounded below, 258
convergent, 255
decreasing, 258
divergent, 255
increasing, 258
monotone, 258
non-decreasing, 258
non-increasing, 258
of partial sums, 260
series, 254
p-series, 266
absolute convergence, 274
alternating harmonic, 269
conditional convergence, 274
convergent, 260
divergent, 260
gamma, 260
harmonic, 263
integral test, 266
interval of convergence, 260
Maclaurin, 284
radius of convergence, 280
Taylor, 286
Simpson’s rule, 185
Sine, 314
sphere, 314
surface area, 314
volume, 314

T
tangent line, 30
taylor series, 286
Torielli’s trumpet, 220, 236
torus, 231
torus, 236
transcendental function, 71

V
variance, 227
volume, 213
